

Table of Content

Chapter 1: Introduction

1. General introduction 1-2

Chapter 2

2. Introduction 3-5
- 2.1. Research methodology 5
- 2.2. Distribution and botanical description 7-10
- 2.3. Traditional uses, ethnopharmacology and polyherbal formulations 10-11
- 2.4. Phytochemicals from *T. wallichiana* 11-16
- 2.5. Pharmacological study 16-41
- 2.6. Structure-activity-relationship (SAR) 42
- 2.7. Adulterants and products 42-43
- 2.8. Conclusion 44-45

Chapter 3: Materials and method

- 3.1. Objective 1: Collection and identification of *T. wallichiana* from the Himalayas. 45
- 3.1.1. Plant material: collection and identification 42
- 3.2. Objectives 2 & 3: Identification of elite chemotypes in terms of paclitaxel production from different Himalayan population of *T. wallichiana* using a validated HPTLC method & quantification of altitudinal, seasonal, and tissue specific variation of paclitaxel based on different chemotypes. 42
- 3.2.1. Plant materials and extraction 45
- 3.2.2. Chemicals 46
- 3.2.3. Standard preparation 46

3.2.4.	Chromatographic development and scanning	46
3.2.5.	Derivatisation reagents	46
3.2.6.	Preparation of standard curve	47
3.2.7.	Method validation	47
3.2.8.	Statistical analysis	48
3.3	Objective 4: Qualitative and/or quantitative detection of some other phytochemicals from the selected chemotypes.	48
3.3.1.	Phytochemical analysis	48
3.3.1.1.	Extraction	48
3.3.1.2.	Alkaloids tests	48
3.3.1.3	Test for Flavonoids	48
3.3.1.4	Test for Glycosides	49
3.3.1.5	Phenols test	49
3.3.1.6	Test for Saponins	49
3.3.1.7	Test for Steroids	49
3.3.1.8	Test for Tannins	49
3.3.1.9.	Test for Terpenoids	49
3.3.2.	Quantitative tests	49
3.3.2.1.	Gas chromatography–mass spectrometric analysis (GC-MS)	49
3.3.2.2.	Spectroscopic methods	50
3.3.2.2.1.	DPPH Assay	50
3.3.2.2.2.	ABTS assay	50
3.3.2.2.3.	FRAP assay	51
3.3.2.2.4.	FC assay	51

3.3.3.	Statistical analysis	51
3.4.	Objective 5: Genotoxicity assessment of the various plant extracts and pure compound.	53
3.4.1.	Method of preparing <i>T. wallichiana</i> aqueous extracts	53
3.4.2.	Genotoxicity test	53
Chapter 4: Results and Discussion Part I		
4.1.	Introduction	54
4.2.	Results	55
4.2.1	Objective 1: Collection and identification of <i>T. wallichiana</i> from the Himalayas.	55
4.2.1.1.	Plant material: collection and identification	55
4.2.1.2.	Objective 2: Identification of elite chemotypes in terms of paclitaxel production from different Himalayan population of <i>T. wallichiana</i> using a validated HPTLC method	56
4.2.1.3.	Selection of elite chemotypes using HPTLC	57-63
4.2.1.4.	Method validation	63-65
4.3.	Objective 3: Quantification of altitudinal, seasonal, and tissue specific variation of paclitaxel based on different chemotypes	65
4.3.1	Altitudinal variations	65-67
4.3.2	Tissue specific Variation	67-70
4.3.3.	Seasonal variation	70-72
4.4.	Discussion and conclusion	72-75
Chapter 5: Results and Discussion Part II		
5.1.	Introduction	77-78
5.2.	Qualitative detection	79
5.3.	Quantitative analysis	79

5.3.1.	GC-MS analysis of ethyl-acetate extracts of bark and needles of <i>T. wallichiana</i>	79-84
5.3.2.	Antioxidant assay	85-88
5.4.	Discussion and conclusion	88-89
Chapter 6: Results and Discussion Part III		
6.1.	Introduction	91
6.2.	Pure compound	91
6.3.	Assessment of the cytotoxic and genotoxic properties of <i>T. wallichiana</i> extracts (TW1) with the <i>A. cepa</i> root tip test	92-95
6.4.	Tissue-specific genotoxicity and cytotoxicity testing using <i>A. cepa</i> root tips	96
6.5.	Discussion and conclusion	97
Chapter 7: Summary, Significance and Future direction		
1.	Summary	98-100
2.	Significance	99
3.	Future direction	100
	References	101-114
